

H2CAP *Plus*

What type of water are you drinking?

Oxidation is -essentially- a decay, just like a sliced apple exposed to oxygen. 90% of diseases are caused by damaged cells and DNAs in our body.

Hydrogen molecule is the most powerful ANTI-OXIDANT in the universe. It effectively recovers damages cells and DNAs.

It is 1~2 bottles of water that changes our body and life. Drinking hydrogen water can be very effective way to enhance our immune system greatly, by reducing free radicals generated in our body.

Introducing H2CAP

This tiny hydrogen water generator converts any bottled water into hydrogen-rich water in the shortest time ever. Meet H2CAP, the smallest, lightest and strongest hydrogen water generator in the world.

1 Best design with Safe materials

Safe materials

Stainless Steel

Light but hard case

Non-toxic silicone

The silicone that has no toxic elements

TRITAN

BPA FREE body

It weighs only, **53g**

Easy to use

² Incomparable Technology

✓ Over 1,000 PPB

The world's first 9-Layers hydrogen water generating system with

- 1) CROSS-MESH type of platinum titanium plates
- 2) Specially designed cation exchange membrane
- 3) The most sophisticated PCB,

H2CAP generates the purest & abundant hydrogen water over 1,000 PPB.

✓ ORP : -400mV

ORP stands for Oxidation Reduction Potential, the ability to reduce oxidation process in our body. It goes down to -400mV, which is very low(Strong oxidation ability).

✓ 3 Min 30 Sec

Just invest 3 minutes and 30 seconds. H2CAP perfectly converts bottled water into hydrogen-rich water in such a short time.

3

1,000 PPB, always.

H2CAP periodically diagnosis the condition of plates and membrane and ensure it can generate the purest hydrogen water over 1,000 PPB, every time you use it.

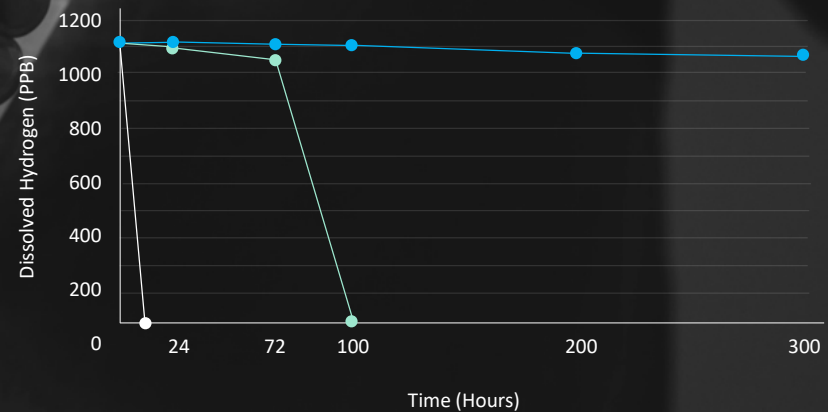

Additionally, using specially invented membrane and platinum titanium plates to produce the most efficient electrolysis method, H2CAP perfectly generates high concentration and exceptionally long-lasting hydrogen water.

4

It lasts longer.

Unlike the other hydrogen generators in this industry, hydrogen tend to stay much longer than ever.

— H2CAP with Lid closed
— H2CAP with Lid opened
— Other hydrogen generators

You can use H2CAP
with smartphone, PC,
power bank and so on.

5 Versatility.

Use it anywhere, anytime, with any water bottle.

Lid width : 30mm

Power supply : USB C type

6

It alarms you.

H2CAP lets you know when to drink the generated hydrogen water, and when to clean the H2CAP by blinking Colored LED light at the bottom of H2CAP (White LED / Orange LED).

WHITE LED

- White LED turned on : Generating hydrogen water
- White LED Blinking : Cleaning mode on

ORANGE LED

- Orange LED turned on : Generating hydrogen water
- Orange LED Blinking : Needs cleaning
- Orange LED Blinking fast : Temporary product failure

7

Cleaning Mode

When you see the orange LED blinking, you need to clean the H2CAP to get a better hydrogen water. H2CAP has a cleaning function that perfectly cleans hydrogen generating devices including plates and membrane.

With the DESCALER offered, you can effectively clean H2CAP and drink the purest hydrogen-rich water.

- Check our manual and website to see how to use the cleaning mode with the DESCALER.

Specification & Composition

Product Name	H2CAP Plus
Size	37.2mm(W) * 42.5mm(H)
Weight	53g
Power	USB
Electricity consumption	3.5W
Recommended amount	500ml
Recommended Temperature	1~28 °C
Materials	Case : STAINLESS STEEL 304
	Main Body & Cap : TRITAN
	Bottom support : NON-TOXIC PLATINUM
	Electrolysis plates : TITANIUM PLATINUM
Electrolysis Method	Membrane method
Operating time	3 Min 30 Sec
Electrolysis performance	Dissolved Hydrogen : More than 1,000 ppb
	ORP : -400 mV
Made in	South Korea
Warranty	One year (12 Months)

Composition

Pouch

H2CAP

USB Cable

Descaler

E-Manual

Test Kit

Separate composition

Descaler Set

Test Kit Set
